

How the Three Actors Work Together

| Actor | Actions | Related Collections |
|----------|---|--------------------------------------|
| Customer | Browse menu, place orders, track order status | users, menuitems, orders |
| Admin | Manage menu, process orders, assign drivers | users, menuitems, orders, deliveries |
| Driver | Accept delivery assignments, update delivery status | users, deliveries |

Assumed Workflow

Customer Places an Order

- **Customer selects items** from the menu (menuitems collection).
- **Order is created** in the orders collection.
- **Status starts as PENDING.**

Admin Processes the Order

- **Admin updates order status** (READY → IN TRANSIT).
- **Admin assigns a driver** to the order (deliveries collection is updated).

Driver Delivers the Order

- **Driver picks up the order** (status: IN TRANSIT).
- **Driver updates order status** (status: DELIVERED).

Customer Checks Order Status

- **Customer can track the order** from orders or deliveries.
